

SHIVAM MORE

Lead Data Engineer | Agentic AI Engineer | Cloud and Spark Specialist

Pune, India | +91-7020093806 | shivamkm1692000@gmail.com | LinkedIn: [linkedin.com/in/shivam-more](https://www.linkedin.com/in/shivam-more) | GitHub: github.com/shivamkm1692000

SUMMARY

Lead Data Engineer with 4+ years of experience designing cloud-native data platforms on GCP and Azure for high-volume batch and real-time workloads. Expert in Apache Spark, PySpark, SQL, Airflow, Snowflake, and Databricks with a record of optimizing ETL/ELT pipelines for performance, reliability, and cost. Hands-on builder of Agentic AI and GenAI solutions using LangChain, LangGraph, RAG, and Vector DBs, integrating LLMs (OpenAI, Azure OpenAI, Vertex AI) with enterprise data systems. Known for delivering observable, production-grade systems and mentoring engineers.

TECHNICAL SKILLS

Languages: Python (Pandas, PySpark, FastAPI), SQL (CTEs, Window Functions, Optimization), Shell, Java

Big Data and Cloud: Apache Spark, PySpark, Databricks, Delta Lake, Kafka; GCP (BigQuery, Dataproc, GCS, Pub/Sub, Vertex AI); Azure (ADLS Gen2, Synapse, Data Factory, Azure OpenAI, Azure AI Search)

Warehousing and DBs: Snowflake, BigQuery, Synapse, SQL Server, MongoDB, PostgreSQL

Orchestration and ETL: Apache Airflow, Snowflake Tasks, Azure Data Factory, dbt

Agentic AI / GenAI: LangChain, LangGraph, LlamaIndex, RAG, Prompt Engineering, Tool Calling, MCP, OpenAI, Anthropic Claude, Hugging Face

Vector DBs: Pinecone, Weaviate, ChromaDB, pgvector, FAISS, Azure AI Search

MLOps / LLMOps: MLflow, LangSmith, LangFuse, RAGAS, Guardrails

DevOps and Observability: Docker, Kubernetes, Jenkins, Azure DevOps, GitHub Actions, Git, Azure Monitor, Stackdriver

WORK EXPERIENCE

Persistent Systems, Pune, India

Feb 2022 - Present

Lead Data Engineer (Lead Software Engineer) | Apr 2026 - Present

- Lead architecture and delivery of cloud-native data and AI platforms on GCP and Azure; own technical roadmap and standards for a team of data engineers.
- Architect Agentic AI solutions with LangChain and LangGraph, integrating Azure OpenAI and Vertex AI with enterprise data via RAG, tool calling, and vector search.
- Drive Spark and BigQuery performance and cost tuning (partitioning, broadcast joins, AQE, query rewrites), reducing job runtime and cluster spend.
- Mentor engineers on PySpark, SQL, and GenAI patterns; establish review checklists, runbooks, and observability standards.

Senior Data Engineer (Senior Software Engineer) | Sep 2024 - Mar 2026

- Cut compute spend 20% across GCP/Azure via lifecycle policies, autoscaling, and spot instances.
- Designed centralized observability (Azure Monitor, Stackdriver) with custom metrics and alerts, reducing pipeline MTTR by 40%.
- Re-architected legacy PySpark ETL with partitioning, broadcast joins, and Delta Lake, improving throughput 3x.
- Modernized Jenkins and Azure DevOps CI/CD with automated tests and rollback, enabling faster, more predictable releases.

Software Engineer (Data Engineer) | Jul 2022 - Aug 2024

- Orchestrated ETL with Airflow DAGs and Snowflake Tasks, ensuring 99.9% data availability for daily reporting.
- Built near-real-time pipelines using Spark Structured Streaming and Pub/Sub, cutting insight latency from hours to minutes.
- Automated deployments with Shell and Jenkins, saving 60 minutes per release and eliminating config drift.
- Built reusable PySpark/SQL ingestion and validation frameworks, standardizing pipeline development across clients.

Software Engineering Intern | Feb 2022 - Jul 2022

- Trained on Azure, Databricks, and PySpark; supported migration of on-premise workflows to cloud-native architectures.

KEY PROJECTS

- Agentic RAG Assistant: LangGraph agent that retrieves context from pgvector and runs SQL tools on BigQuery to enable analyst self-service Q&A.
- Self-Healing Pipeline Agent: Monitors Airflow failures, classifies root cause via LLM tool calls, and auto-files Jira tickets with proposed fixes.

CERTIFICATIONS

Google Cloud Professional Data Engineer | Google Cloud Associate Cloud Engineer | Microsoft Azure Fundamentals (AZ-900)

EDUCATION

B.E., Computer Engineering, Savitribai Phule Pune University, 2019 - 2022 | CGPA: 9.39
